Dear Hiring Manager,

I am writing to express my interest in the Backend Developer position. I am a Backend Developer with 1 year of hands-on experience working with Django and FastAPI, where I have built scalable, secure, and high-performance RESTful APIs for real-world applications. I have solid expertise in PostgreSQL, including database design, query optimization, and efficient data handling to support backend systems.

In addition to traditional backend development, I have practical experience in Generative AI, including LLM integration, prompt engineering, and building AI-powered backend features using modern tools and frameworks. I enjoy combining backend engineering with AI to create intelligent, production-ready solutions.

I am highly motivated, quick to learn, and passionate about continuously improving my skills while contributing value to the team. I would welcome the opportunity to discuss how my backend and Generative AI experience can support your organization's goals.

Sincerely,
Syed Jawad Ali
